Dear Sir or Madam,

As a computer science undergraduate at the IUT Bayonne, University of Pau I am looking for a placement within a web-development company from 14th April to 20th June of next year. I am writing to you as I understand that Altanoveo may have appropriate vacancies available. I have a strong interest in web-development.

I first became interested in the web industry through my development projects (personnal and school related) which led me to use programming languages linked to the web-development field. Since the, discussions with my career advisers has confirmed my decision to aim for a position in this field.

Thanks to my degree course, I have been able to develop my interest in programming whilst improving my conception and modelling skills I have gained valuable experience in project management. I achieved 65% in my first year examinations and I am hoping to achieve good grades for my course work this year. While at University, I have also been able to utilise my skill set in working with people through a variety of seasonal jobs and a few computer programming projects. My work for my main project Noteo(a web application aiming to generate statistics over a liste of grades) was valuable in teaching me the importance of teamwork, persistence and planning.

I would be most grateful if you could consider me for any suitable positions within your company. I will be available for interview if required at any time up until Easter. I will be at my home address in Bayonne from 18th December to the 4th January at all other times I can be contacted at my college address. Please find enclosed my CV where you will find further information.

Yours sincerely,

Arthur Murillo
